BACKGROUND TO THE FORMATION OF THE ETHIOPIAN EVALUATION ASSOCIATION

Both before and during 1999, a number of professionals had felt the need for an evaluation association that would help them to organize and discuss their joint professional problems and experiences.

However, this expressed need and the wish for an association did not go very far until UNICEF-Ethiopia took over the initiative to organize one by forwarding the issue to the Ethiopian Statistical Association Advisory Board. And then through a meeting arranged by UNICEF at Hilton Hotel on 15 May 2007, an organizing Committee was nominated. A petition was then signed by 10 professionals and this petition was addressed to the Ministry of Justice to get its legality to function as a professional association in July 2007 and a letter on the 23rd of October 2007.

During the period between July 2007 and August 13, 2008(the date EEVA attained legal certificate), the Founding and Organizing Committee took the following steps:

1. Prepared a draft constitution.
2. Approached the UNICEF-Ethiopia to get the necessary support needed to form the Association.
3. Approached the Ministry of Justice to get legal license to form the Association.
4. Contributed and raised the necessary funds required for the registration of the Association and for the inaugural conference.

Through all this, the committee had the full collaboration and support of UNICEF-Ethiopia as well as that of the Ethiopian Statistical Association. The last step taken by the Founding and Organizing Committee were to call and organize the inaugural conference of the Association on March 14, 2009.
